Here are some examples of how Machiavelli's ideas can be applied in the modern world:

- **Be cunning.** This does not mean being dishonest or manipulative, but it does mean being aware of your own strengths and weaknesses and of the strengths and weaknesses of your opponents. It also means being able to think strategically and to anticipate the consequences of your actions.
- **Be adaptable.** The world is constantly changing, and the only way to succeed is to be able to adapt to change. This means being willing to change your plans and your tactics as necessary. It also means being able to learn from your mistakes and to grow from your experiences.
- **Be opportunistic.** The best way to achieve your goals is to take advantage of opportunities when they arise. This means being aware of your surroundings and being able to identify opportunities when they present themselves. It also means being willing to take risks and to seize opportunities when they come along.
